I am very concerned about an automated call I receive everyday. I have
complained to the company and they keep sending it. It's not even for us but for
a family member. I told them that if they had business with him, it's there
problem to find out where he lives and to contact him. We have nothing to do
with his personal life. But they keep sending this call. I feel like
cancelling my phone # or getting it unlisted. Why as American Citizens do we
have to put up with this type of solicitation. Our rights are being taken away
from us daily and you think you have the right to tell us who can call and who
cannot? That's wrong.

If we pay between 60 & 80 a month for the phone and 20 for email, you have no
right to tell us who can call unless you want to help us with paying the bill.
